

HENG SENGTHAY

Year 3 Data Science and Engineering - Royal University of Phnom Penh

sengthay32@gmail.com | github.com/Thay32-Heng

OBJECTIVE

Year 3 data student seeking internship opportunities in data science, data engineering, analytics, or machine learning. I learn through coursework, labs, and public GitHub projects.

EDUCATION

Royal University of Phnom Penh - Year 3, Data Science and Engineering.

TECHNICAL SKILLS

Python, Pandas, NumPy, Jupyter, Streamlit, Matplotlib, Folium, TypeScript, React, Vite, CSV workflows, data cleaning, and offline-first prototypes.

SELECTED PROJECTS

EduRisk Analytics - Interactive Streamlit dashboard for attendance, scores, and student risk levels.

<https://github.com/Thay32-Heng/EduRiskAnalysis>

Phnom Penh Precipitation Analysis - Time-series analysis of monthly rainfall from 2015 to 2025.

<https://github.com/Thay32-Heng/Phnom-Penh-Precipitation-Time-Series-Analysis>

Kasekor Vision - Interactive map prototype recommending crops from environmental factors.

<https://github.com/Thay32-Heng/Kasekor-Vision>

JamTlai - Offline-first grocery price checker with Khmer/English search and KHR pricing.

<https://github.com/Thay32-Heng/JamTlai>

MOTTO

Stay quiet, keep building - let success speak.
